PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science & Design student with hands-on experience across software development, AI/ML, UI/UX design, and database management. Proven ability to deliver production-ready work through a professional internship, end-to-end project builds, and cross-functional team collaboration. Experienced with Java, Python, SQL, and tools including Figma, OpenCV, TensorFlow, and Unity3D. A fast learner with strong foundations in OOP, data structures, and problem solving — eager to contribute to any IT role across development, design, or technology operations.

TECHNICAL SKILLS

- **Languages:** Java, Python, SQL
- **Core Concepts:** OOP, Data Structures, Problem Solving, Git / GitHub
- **AI / ML:** OpenCV, TensorFlow, Data Preprocessing, Classification Pipelines
- **Databases:** MySQL, SQLite — schema design and query writing
- **Game Dev:** Unity3D — player mechanics, enemy AI, scene management
- **UI / UX:** Figma, Adobe XD, Canva — wireframes, prototypes, responsive design

EXPERIENCE

Project Intern — UI/UX Design — Proxenix

Apr 2025 – Jun 2025

- Delivered responsive wireframes and interactive Figma prototypes for a live client project across multiple sprint cycles.
- Translated user requirements into functional UI specs with zero revision cycles at handoff, working directly with developers and QA.
- Operated within a professional SDLC — on time, every sprint — bridging design and development from day one.

PROJECTS

Animal Behavior & Emotion Analysis using AI

2024 – 2025

Python | OpenCV | TensorFlow | Machine Learning

- Built end-to-end pipeline to detect and classify animal behavior from video and audio — from raw data to model output.
- Applied ML classification with feature engineering that measurably improved accuracy; integrated OpenCV for real-time video processing.

First-Person Shooter (FPS) Game

2023 – 2024

Unity3D | C# | Git

- Built a fully playable 3D FPS from scratch — player movement, shooting mechanics, and enemy AI with pathfinding — coordinated via Git.

EDUCATION

B.Tech — Computer Science and Design

2022 – 2026

Vimal Jyothi Engineering College, Kannur | CGPA: 6.84 / 10 (Sem 1–7)

Higher Secondary — Science

2020 – 2022

GHSS Sreepuram, Manakadavu | 83.33%

High School (KBPE)

2019 – 2020

GHSS Sreepuram, Manakadavu | 95.56%

CERTIFICATIONS

- Data Science with Python — Techmaghi (Nov 2024)
- Workshop on Interiors in Virtual Reality — Techmaghi (Apr 2024)
- Robotics Workshop — Nyeste Venture Technologies Pvt Ltd (Feb 2024)

SOFT SKILLS & LANGUAGES

Communication | Team Collaboration | Problem Solving | Adaptability | Quick Learner
English (Proficient) | Malayalam (Native)
